TITLE

Abstract: This document presents a template for preparing the papers that will be published in Review of the NCD. We strongly recommend preparing your paper following the form of this template. Abstract and keywords should be written in Times New Roman, 10pt.

Keywords: template, National Center for Digitization

1. Section Title

This template is prepared supposing that you will prepare your text in MS Word. Please use Times New Roman font, 12 pt. All the elements of your text should be formatted as this document. Paragraphs should be indented, without additional spaces between paragraphs. Paper format A4, margins 2.5cm (left/right) and 3cm (top/bottom). Put additional space of about 2cm at the top of the first page. Pagination should be on top, outside.

Please be aware that you write for experts (as you are) that want a fast and short information, so try not to overwhelm the text with nice but useless illustrations. They blow up your files and slow down internet traffic.

1.2. Subsection Title. Please make a clear difference between sections and subsections. All the tables and illustrations should be numbered for referencing, since it may be necessary to move them across the text.

At the end put your list of references with the following data: Author, *Title*, Source, Year (for printed materials) and Author, *Title*, active url, (date of last access), for internet materials. At the end put your e-mail address.

1.2. Submitting. Submit your paper by e-mail to ncd@matf.bg.ac.rs.
